PROFESSIONAL SUMMARY

Computer Science graduate focused on AI, machine learning, and data engineering. I build bilingual (Arabic/English) retrieval-augmented generation applications, ETL pipelines, and web backends with Python, SQL, Django REST Framework, and React. Completed the DEPI Data Engineering track and currently enrolled in the DEPI Machine Learning Engineer track. Based in Riyadh and open to on-site and remote roles.

TECHNICAL SKILLS

Languages: Python, SQL, C++, C#, Java, JavaScript
AI / ML: Retrieval-augmented generation (RAG), LLM integration, hybrid search (FAISS + BM25), scikit-learn
Data Engineering: ETL, data cleaning and preprocessing, SQL, Apache Airflow (basic)
Backend / Frontend: Django REST Framework, React, Vite
Databases: SQL Server, SQLite
Cloud / Platforms: Microsoft Azure Cognitive Services, Hugging Face Spaces and Inference API
Tools: Pandas, NumPy, Git, GitHub, Docker, Jupyter Notebook, Linux, Windows

PROJECTS

Phoenix EduPlan: Bilingual AI Study Assistant Graduation Project, 2025 - 2026

- Graduation project, final grade A. Bilingual (Arabic/English) study platform that combines hybrid retrieval (FAISS + BM25) with an LLM chat interface, deployed on Hugging Face Spaces.
- Built backend services with Django REST Framework and a React/Vite frontend.
- Fixed a global-state leak by adding per-user session isolation and authentication, so concurrent users no longer see each other's data.
- Debugged the Azure Cognitive Services text-to-speech integration (SSML formatting bugs) and added caching to avoid redundant API calls.
- Used AI-assisted tools during development; owned the debugging, integration, and fixes above through multiple review cycles.

Health-Fact: AI-Based Health Monitoring Team Project, 2024 - 2025

- Worked in a cross-functional team on an embedded system that applies machine learning to sensor data to track health indicators such as blood pressure and blood sugar.
- Processed and interpreted real-time sensor data and coordinated with teammates across the hardware and ML components.

WORK EXPERIENCE

Part-Time Programming Instructor, El Mentor & Udacity 2024 - 2026

- Teach Python and programming fundamentals on two platforms to learners at different skill levels.
- Write example-driven lesson material that breaks problem-solving into clear steps.
- Run project-based coding exercises that build students' collaboration and communication.

EDUCATION

Bachelor of Computer Science, Teba University 2026

CERTIFICATIONS

- Digital Egypt Pioneers Initiative (DEPI): Machine Learning Engineer Track (in progress)
- Digital Egypt Pioneers Initiative (DEPI): Data Engineering Track (completed)
- DataCamp: Data Engineering Track (completed)
- Armed Forces Information Systems Institute: Cybersecurity course, 2 weeks (completed)
- Masa Academy: Python Programming (completed)

LANGUAGES

Arabic (native) | English (professional working proficiency) | German (elementary, A1)
